

Malusi Thandolwethu Nathan Nkosi (Mr)

PERSONAL INFORMATION

Full Name:	Malusi Thandolwethu Nathan Nkosi (Mr)
Current Location:	Based in South Africa – Durban
Nationality:	South African
EE Status:	Black African
Drivers:	EB
Languages:	English, Zulu
Notice Period:	2 Calendar months (60 days)

TRAINING / EDUCATION

- **2024** Eduvos – National Higher Certificate in Software Development
- **2025 – 2028** Eduvos – BSc Software Engineering

PROFESSIONAL PROFILE

Mr. Nkosi is a driven and passionate Software Engineering student with a strong foundation in both front-end and back-end programming languages, database management, and software design. He has developed advanced skills in languages such as C#, Java, and Delphi, which are supplemented by his understanding of basic web development languages like HTML, CSS, and JavaScript. Mr. Nkosi has a keen interest in software development and database management, focusing on using technology to build efficient and scalable systems.

Throughout his studies, he has demonstrated a capability for problem-solving and algorithm development, coupled with hands-on experience in program design and database management. Mr. Nkosi is committed to continuous learning, excelling in both academic and practical settings, and is poised to contribute to the future of software engineering. He also has an interest in Linux operating systems and aims to develop expertise in cloud computing and cybersecurity.

Skills

- **Software Development:**
Proficient in C#, Java, and Delphi for advanced programming, with a deep understanding of software development life cycle (SDLC) and object-oriented programming (OOP) principles.
- **Web Development:**
Knowledgeable in HTML, CSS, and JavaScript for front-end development, focusing on building responsive and user-friendly interfaces.
- **Database Management:**
Experienced in database design and management using MySQL and SQL, understanding database architecture, normalization, and optimization techniques.
- **Linux Operating Systems:**
Comfortable working within Linux environments, including navigation, scripting, and troubleshooting.

LinkedIn Profile: <http://www.linkedin.com/in/malusi-nkosi-6995a92b1>

- **Program and System Design:**
Strong grasp of program design principles, including modular programming, software architecture, and user interface (UI) considerations.
- **Version Control Systems (Git):**
Basic understanding of Git for version control and collaborative software development.
- **Team Collaboration and Communication:**
Experience working in teams on projects and good communication skills, both verbal and written, to clearly present ideas and technical concepts.

CAREER SUMMARY

(Currently focused on education and skill-building in the field of Software Engineering.)
